CONCRETE UNIT PAVER AT MEDIAN OR SIDEWALK

1. Deep joint and felt joint to alternate at every 15'.

CONCRETE UNIT PAVER AT PARKING STRIP W/ GUTTER

1. Mortar shall cure for 72 hours minimum before allowing vehicular traffic unless otherwise approved by City Representative.

GENERAL NOTES:
1. See "City of San Francisco Standard Parking Palettes" (Table 1) for permissible paver size and color.
2. Pavers to be installed per manufacturer's recommendations.
3. See SFPM STD. SPECIFICATIONS FOR CONCRETE BASE DEPTH.
4. Place expansion joints per SFPM STANDARD SPECIFICATIONS.
5. See SFPM STD. PLAN 87.727 FOR CONSTRUCTION JOINT DETAILS.
6. If encountered, shallow utilities to be protected in place.
7. For joints greater than 1/4", use grooved as joint filler. For joints 1/8" or less, use polymers sand as joint filler.

EXPANSION JOINT, TYP

1. Place expansion joints where paving abuts all vertical surfaces.
