LOCATION- Islais Creek Bridge - Third Street between Cargo Way and Marin Street

PROJECT INFORMATION

District 10

Start - Fall 2028

Completion - Fall 2030

Budget- \$60,000,000

PROJECT OVERVIEW

The City and County of San Francisco, led by Public Works, is proposing to replace the existing Islais Creek Bridge along Third Street in San Francisco's Bayview district. The existing Islais Creek Bridge is structurally deteriorated and seismically deficient. The proposed replacement bridge will meet current structural and seismic standards and will be more resilient to projected future sea-level-rise impacts.

WHAT TO EXPECT

This project would result in the replacement of the existing drawbridge with a fixed-span bridge at a higher elevation. The new bridge would accommodate a center 26-foot-wide dedicated light-rail transit trackway, two 11-foot travel lanes in each direction, a 12-foot-wide shared pedestrian/bicycle path on the eastern side of the bridge, and a 17-foot-wide shared pedestrian/bicycle path on the western side of the bridge.

SCHEDULE

Environmental Clearance/Preliminary Engineering: 54 months
December 2021 – June 2026

Federal Authorization, Detailed Design and PS&E Preparation, ROW Certification: 20 months
July 2026 – March 2028

Advertisement, Bid & Award: 6 months
April 2028 – September 2028

Construction Contract: 30 months
October 2028- March 2031

Active Field Construction: 24 months
January 2029 – December 2030

DESIGN STATUS

*Fixed-Span Bridge to 35% Design – (Preliminary Engineering and Environmental Phase)

*CEQA was completed earlier this year. NEPA final analysis and reviews in progress.

*A Structures Type Selection Report is currently under review with Caltrans. Concurrence by the Caltrans Highway Bridge Program is an essential step to moving forward with the detailed design phase.

*Transportation analysis, transit, and traffic detours are in development in coordination with SFMTA.
