## San Francisco Public Works

## Sloat Boulevard Pedestrian Safety Improvements - Phase 2

What's happening: The future pedestrian safety improvements for Sloat Boulevard at Everglade Drive will provide a safer environment for pedestrians, motorists, cyclists and transit riders with the installation of special traffic calming features such as bulb-outs, curb ramps and extended medians.

## Improvements:

- Add a bulbout, or sidewalk extension, at the north and south ends of the western crosswalk to shorten the distance to cross Sloat Boulevard
- Install a bus bulb-out at the north side of Sloat Boulevard just west of Constanso Way
- Extend the median islands in the middle of Sloat Boulevard to provide improved pedestrian refuge areas
- Make Everglade Drive rightturn-only onto Sloat Boulevard heading east
- Add bulb-outs at Everglade Drive to increase pedestrian safety
- Construct ADA compliant curb ramps at the intersection

When: Construction planned to begin Summer 2015 Where: Sloat Boulevard at Everglade Drive
