---

The Accessible Business Entrance (ABE) Program helps property owners comply with local, state, and federal accessibility laws and helps people with disabilities gain greater access to goods and services offered by businesses in San Francisco.

This standard is developed and adopted by Public Works pursuant to Board of Supervisors Ordinance 51-16. Mandatory disability access improvements technical specifications guidelines. The ordinance requires that existing businesses with a place of "public accommodation" have all primary entrances accessible for people with disabilities.

These city standard plan sheets are intended for use as guidelines for alterations to existing facilities assisting with the design of accessible entrances and entrance ways to private property from the public sidewalk.
