

Rate Survey
Select Cities

Summary

Armanino LLP (Armanino) completes a periodic comprehensive survey of solid waste rates for various service lines including residential, multi-family and commercial lines of business throughout California. The survey was last completed in 2016. Recology, San Francisco (the Company), requested Armanino update the survey with a subset of cities around the greater San Francisco bay area. As requested, the survey updated collection rates for standard residential service. Rates as reported are effective in January 2017.

The information included in this survey and the accompanying Table are as represented by the cities and/or companies providing collection services as of January 2017. Rates, standard bin sizes and services provided can change at any time. Armanino expects to complete our annual comprehensive rate survey again in spring 2017.
