

June 16, 2017

Attn: **Residents: 60 to 98 Santa Rita Ave**
150 to 318 San Marcos Ave

On Monday, 6/19 we are scheduled to place the final asphalt paving on the upper portion (even addresses) of Santa Rita Ave. and San Marcos Avenue from the dead end to Mesa Ave. In order to place the asphalt we will spray tack oil on the concrete pavement to make the asphalt stick. Once this oil is applied, cars cannot drive on it because the tires will pick up the oil and it will end up on the sides of the vehicle. This oil does not come off.

To avoid any damage to your vehicles, please have them removed from the street and your driveways by 7:00AM Monday morning.

We will start placing the asphalt at the dead end (318 San Marcos) at 9:00 AM and will proceed toward Mesa. About 1 hour after the paving machine places the asphalt, it can be driven on. We will open the road incrementally as we progress toward Mesa.

The work is scheduled as follows:

Monday:

7:00 AM: Clean the road and place tack oil.

9:00AM: Begin paving

3:30 PM clean up and fully open the street.

Thank you for your cooperation. If you have any questions please call Bryan Holm at 310-696-6414.

Thank you,

Alta Engineering Group
