

## STREETSCAPE IMPROVEMENT PROJECT

# POINT LOBOS STREETSCAPE

### POINT LOBOS STREETSCAPE IMPROVEMENT PROJECT

Located in the city's Outer Richmond neighborhood, the Point Lobos Streetscape project boundaries lie between 42<sup>nd</sup> Avenue and 48<sup>th</sup> Avenue. The project aims to address the fast-moving traffic, lack of landscaping, and issues of pedestrian and cyclist safety. One block within the project boundary is currently funded for full improvements, with future segments to be improved with upcoming funds. The traffic calming and aesthetic improvements will create a sense of place while providing visitors and residents with easy and safe access to businesses, parks, schools and transit.

*Planned installation of a median and street trees*

### A COORDINATED EFFORT

The Point Lobos Streetscape Improvement Project is a joint effort by the San Francisco Department of Public Works and Municipal Transportation Agency to provide a safer, greener, and more aesthetically enhanced streetscape. The featured improvements will emphasize Point Lobos as a reimagined street, safe for pedestrians, cyclists, and motorists.

*Increased street greening brings aesthetic improvements*

### PROJECT HIGHLIGHTS

- Installation of a planted median along Point Lobos Avenue.
- Concrete sidewalk repair.
- New lane striping to improve traffic and pedestrian safety.
- Infill planting of street trees to further green Point Lobos Avenue.
- Narrowing travel lanes to reduce traffic speed and increase safety.

### Estimate Project Cost:

\$586,000

### Project Team:

Project Manager:

John Dennis

Project Lead:

William Bulkley

### Schedule:

Construction Begins: July 2013

Construction Completed: November 2013
