NOTICE TO LOCAL RESIDENTS & PROPERTY OWNERS

City of San Francisco

**VARIOUS LOCATIONS PAVEMENT RENOVATION NO. 44 AND SEWER REPLACEMENT
Contract No. 1000012555**

30 DAY NOTICE

San Francisco Public Works has contracted with Michael O'Shaughnessy Construction, Inc. to install new sewer utilities in your neighborhood as part of the Various Locations Pavement Renovation No. 44 And Sewer Replacement project. Sewer work will involve some street excavation in front of your property to install the new utilities and will be followed by pavement renovation (i.e. grinding and paving) activity once all utility work is complete. No interruption of sewer service is expected during construction.

The portion of the work involving your property is scheduled to begin in approximately 30 days on _____. Barring unforeseen problems, the work in this area should be completed by _____. Regular working hours will be between the hours of ____ AM and ____ PM, weekdays, except holidays. Weekend and evening work may be possible, but is not anticipated or scheduled at this time. (Please note, construction schedules, activity and work hours are subject to change due to weather or other unforeseen field conditions).

Before starting work, we may need to verify the locations of existing house connections to the sewer main. This work in some cases will need to be done from fixtures inside the house. If and when this is necessary, a representative from our company will contact you to make an appointment to access the property at a mutually convenient time.

During construction, traffic control will be implemented and "No Parking/Tow Away Zone" signs will be posted. Local access for Residents, Deliveries and Emergency Services will be provided at all times during work hours. We request that you assist us by limiting your use of the roadways within the construction work areas during working hours for the safety of the public and our employees, and to park in driveways or on adjacent blocks when No Parking Zones are posted. Should you need access to your property during work hours, please alert a crew member on site and note that there may be a slight delay to enter or exit your property to allow for crews to create a safe path of travel. Please follow instructions from crew members and follow all posted detour signs.

Although some inconvenience due to construction activity may be possible, we are committed to doing what we can to minimize impacts as we work to complete these necessary utility infrastructure upgrades. During construction, please let our field supervisor know if you have questions or concerns. Call our Project Coordinator Gary Minihane at (415) 799-7043 or the San Francisco Public Works representative, Grace Moore, at (628) 271-2246. Gary Minihane will also be the 24hr emergency contact throughout the course of this work for any questions or queries regarding the operations.

Thank you in advance for your understanding and cooperation on this important project.
