

San Francisco Public Works Infill Sidewalks Project

Project Description

San Francisco Public Works invites you to attend a virtual meeting to discuss the **Infill Sidewalks in Bayview** project. This meeting will be hosted online.

The Infill Sidewalks in Bayview project improvements will install new sidewalks, widen existing sidewalks, or reconstruct sidewalks made of non-standard material with concrete to address gaps and transition slopes along the sidewalk network in the Bayview District.

The project has a limited amount of implementation funding, limiting the number of streets that will be able to receive these improvements. We would like to meet with the community to solicit feedback to prioritize which blocks should receive the improvements with this funding.

For a complete list of areas under consideration to be included in the Infill Sidewalks in Bayview project, and to rank locations in your preference, please visit us at the webpage listed below.
