

## **Modification to the Standardized Format**

**As requested in the Rules of Procedure governing this application, Recology advises that it has made the following modifications to the standardized format:**

1. Instead of presenting their Summary of Significant Assumptions as a Schedule C, Recology San Francisco and the Collection Companies have included documents titled “2017 Refuse Rate Application Summary of Assumptions” just before the corresponding rate schedules for Recology San Francisco and Recology Sunset Scavenger/Recology Golden Gate. As in the past, each of these documents include summaries of significant assumptions supporting the rate calculations.
2. The application no longer includes the Recology San Francisco Rate Table Schedule F.2. With the termination of the Waste Disposal Agreement for the Altamont landfill, there are no items in the Impound Account that are allocated to Recology San Francisco.
3. The application includes a new Section L. titled “Response to June 7, 2013 Director’s Report and Recommended Orders”. This document provides requested follow-up information regarding certain matters raised in the 2013 Director’s Report.
4. Recology has submitted the same set of schedules as in the 2013 rate application, other than the three changes noted above. Therefore, this submission reflects previously approved modifications to the Standardized Format as noted in the 2013 Director’s Report.
