

Lower 24th Street Ficus Trees

Ficus History

- Ficus trees are common in SF (more than 7,000) and have an impressive canopy
- 2014 Director's Order eased removal criteria to address increased number of large limb failures as ficus began to age
- Public Works is in the process of identifying specific ficus trees that are vulnerable to failure near schools, senior centers, along highly travelled corridors, neighborhood commercial districts and on busy street corners

Ficus trees are considered vulnerable to failure if they:

- have competing trunks
- have a history of limb failures
- have a live canopy that makes up less than 30 percent of the tree
- are experiencing canopy decline
- have roots that have been significantly pruned
- are at least 50 feet tall
- have a canopy or trunk that conflicts with streetlights or power lines

Scar from fallen limb, now filled with decay

Competing branches

Citywide Ficus Removals

- Fillmore Street
 - Trees removed and in process of replanting
- Oak / Fell Streets
 - Trees removed and in process of replanting
- 16th and Church Street (Everett Middle School)
 - Trees removed and replanted
- Columbus Avenue (Washington Square Park)
 - Seven trees
 - In hearing process
 - Replacement tree species already picked out and ready to plant
- Hayes Valley
 - 39 trees
 - Public notification period ended recently
 - Hearing will be scheduled for April 2019
 - Will be replanted 2-3 months after removals take place

A photograph of a street scene with a large fallen tree trunk across the road, overlaid with a green tint. The scene shows a residential street with multi-story buildings on both sides. A large, thick tree trunk lies horizontally across the middle of the road, blocking traffic. The ground is wet and reflective, suggesting it has recently rained. Several people are visible near the fallen tree, and a few cars are parked or stopped on the street. The overall atmosphere is one of a recent natural event, likely a storm or heavy rain, that has caused significant damage to the urban environment.

**Ficus safety along
Lower 24th Street**

Lower 24th Street has experienced approximately 41 limb failures in the last 10 years

- Lower 24th Street from Mission Street to Potrero is a high pedestrian, cyclist and motor vehicle commercial corridor

Daily Traffic Volumes

	Pedestrians	Vehicles	Cyclists
Mission and 24th	4,388	2,208	34
South Van Ness and 24th	2,148	4,032	20
Totals	6,536	6,240	54

Additional issues

- Pruning for building clearance has caused imbalances
- Narrow sidewalk

Lower 24th Street Tree Removal Plan

Removal Numbers

Ficus before removals	99
Ficus to be removed	51
Ficus to receive experimental pruning	25
Ficus remaining untouched (no pruning, no removal)	23
Non-ficus to be removed	1
Total # Trees to be removed	52

Replanting Numbers

Sites not replantable	13
Sites replantable	37
Empty / new basins to plant (clear of utility issues and meet all street tree planting guidelines)	12
Empty / new basins with potential to plant (pending utility clearance)	19
Total # replantings and new plantings	68

Totals

Total # trees before removals (all species)	133
Total # ficus to be removed	51
Total trees remaining (non-removals & experimental prunings; ficus & other species)	82
Total replantings / new plantings (includes sites pending utility clearance)	68
Total # trees after removals & replantings / new plantings (includes sites pending utility clearance)	150

Breakdown of work phases

Removals	Sidewalk Work	Replanting and new plantings
<ul style="list-style-type: none">• Trees and stump grinds• Dedicated professional tree contractor	<ul style="list-style-type: none">• Repair cracked and raised sidewalk• Enlarge/reduce tree basins• Move tree basins• Pave over unplantable basins• Dedicated Public Works cement crew	<ul style="list-style-type: none">• Replant tree basins that are free of utility conflicts and meet all tree planting guidelines• Plant in new basins• Dedicated Public Works planting crew• Engage community in designing and customizing tree stakes and cross brace stickers• 4 stakes and wire mesh will be used on all new trees

Removals

Dedicated professional tree contractor

Timeline: From the start of removal to completion, three to four months

Start date: Subject to change depending on

- public notification protests
- public hearings
- the scheduling of work with contractors and in-house crews

When scheduling, we will take into account 24th Street events such as the Carnaval Parade and Festival (May 25 & 26) and Fiesta de Las Americas (September 15)

Removals	Sidewalk Work	Replanting and new plantings
<ul style="list-style-type: none">• Trees and stump grinds• Dedicated professional tree contractor	<ul style="list-style-type: none">• Repair cracked and raised sidewalk• Enlarge/reduce tree basins• Move tree basins• Pave over unplantable basins• Dedicated Public Works cement crew	<ul style="list-style-type: none">• Replant tree basins that are free of utility conflicts and meet all tree planting guidelines• Plant in new basins• Dedicated Public Works planting crew• Engage community in designing and customizing tree stakes and cross brace stickers• 4 stakes and wire mesh will be used on all new trees

Sidewalk Work

Dedicated Public Works
cement crew

Timeline: work begins as soon as tree removal contractors finish a block

Scope of work:

- Repair cracked and raised sidewalk
- Enlarge or reduce tree basins
- Move tree basins
- Pave over unplantable basins

Removals	Sidewalk Work	Replanting and new plantings
<ul style="list-style-type: none">• Trees and stump grinds• Dedicated professional tree contractor	<ul style="list-style-type: none">• Repair cracked and raised sidewalk• Enlarge/reduce tree basins• Move tree basins• Pave over unplantable basins <p>Dedicated Public Works cement crew</p>	<ul style="list-style-type: none">• Replant tree basins that are free of utility conflicts and meet all tree planting guidelines• Plant in new basins <p>Dedicated Public Works planting crew</p> <ul style="list-style-type: none">• Engage community in designing and customizing tree stakes and cross brace stickers• 4 stakes and wire mesh will be used on all new trees

Planting

Dedicated Public Works
planting crew

Timeline: Two to three months after
removals are completed

Species:

- Red maple (Armstrong Maple) along 24th (midblock)
- Ginkgo (Maidenhair tree) on corners of 24th

Watering: Public Works will water with community
support where possible

Red Maple

Ginkgo

New Trees

- Some new trees will be 36" boxes with 4x4 foot basins
- Some will be 24" boxes also with 4x4 foot basins

Currently empty tree basins along Lower 24th Street have been replanted (where sidewalk repair was not required)

Community Requests

- Christmas lights
- Custom-designed tree stakes and/or crossbrace stickers

Project Commitments

- ✓ Public Works will provide bi-weekly project updates to Supervisor Ronen's Office and community while project is ongoing
- ✓ Public Works will provide dedicated contact for questions, concerns, updates, etc. while project is ongoing

Common concerns to tree removals

Aren't you supposed to be growing our Urban Forest? Why do these trees have to come out if we want more trees in San Francisco?

Our aim at Public Works is for San Francisco to have a thriving, robust urban forest.

However, while we celebrate the many important benefits that mature trees provide, and while we always look for all alternatives prior to choosing tree removal, protecting **public safety remains our Number 1 priority.**

Common concerns to tree removals

How can we trust that you will replant the trees you are removing and that you will plant them in a reasonable amount of time?

ANY time we remove a lot of trees in one area we prioritize a replacement tree replanting plan for that area.

Lower 24th Street will be prioritized for replanting given that is a major city corridor that will be losing a large amount of trees.

Common concerns to tree removals

How can you ensure the new trees won't bring their own problems?

The City is now responsible for the care and maintenance of all trees in the public right of way. The StreetTreeSF program is funded so that each and every street tree in San Francisco is cared for and inspected on a frequent, ongoing basis.

Structural pruning of these new 24th Street trees will be managed by Public Works Bureau of Urban Forestry. This will ensure the trees grow in a way that works with, and not against, the structures along 24th Street.

Moving Forward

- Look for updates from:
 - Supervisor Ronen's Office
 - Calle 24 Merchants
- Walk 24th with Public Works arborist
- sfpublicworks.org/ficustrees
