Project Description:

San Francisco Public Works is scheduled to grind (remove existing asphalt) and repave the Intersections of Palo Alto Avenue / Glenbrook Avenue and St. Germain Avenue / Glenbrook Avenue on Friday, May 7, 2021.

During the grinding phase (removal of existing asphalt from the roadway), access to enter and exit driveways will be maintained, however slight delays should be expected if crews are working on the lane closest to your driveway. Please allow extra travel time.

During the paving phase, driveway access may be delayed while crews work on the lane closest to your driveway. The contractor will apply a tack coat (liquid asphalt) to the roadway in advance of the hot asphalt. The tack coat promotes bonding between the concrete street base and the hot asphalt. During application of the tack coat and new asphalt, driveway access may not be available until the asphalt cools down.

Impacts and Restrictions:

Sidewalk access will always be maintained. During the grinding phase, driveway access may be possible however delays should be expected. During the paving phase, driveway access will not be possible until the asphalt cools down. We apologize for the inconvenience and thank you for your patience as we make these improvements.

Work Schedule:
Friday, May 7, 2021 / 7am – 6pm
